

Excellence in peer review: how to be an effective peer reviewer

[Register your place at the event](#)

What to expect at the event

Whether an article can be accepted or not depends on the opinions of the reviewers. However, even experienced reviewers may not always be clear on what to focus on during the peer review process. So, we hope that you can participate in this training, regardless of whether you are the author or the reviewer.

Here, we have summarized the opinions of various experts to help you sort out various aspects that need to be understood during the peer review process. Including:

- An overview of the different types of peer review
- The responsibilities of a peer reviewer
- What are the reviewers focusing on in peer review
- Ethical concerns in peer review

We offer certificates to participants who complete the workshop.

If you would like the opportunity to gain further experience as a reviewer and establish closer connections with journals, after attending this workshop, you can become a member of the Taylor & Francis Talent Pool.

About the speakers

Priya Dixit is currently working as a Reviewer Selection Lead in the Global Peer Review department. She holds a master's degree in Biotechnology from Dr. D. Y. Patil Biotechnology and Bioinformatics Institute, Pune. She has 7 years of experience in publishing industry. Her key responsibilities are handling the reviewer selection process for Expert Collection Journals.

Sukrit Bhattacharyya is the Team Lead-Content Review in the Global Peer Review department at Taylor & Francis. He is mainly responsible for ensuring smooth and timely reviewer selection process for the manuscripts along with checking the

quality and appropriateness of the selected reviewers. He is also involved in checking the submitted manuscripts for editorial requirements and scope checks.

Editor Spotlight: getting published in Education Journals

[Register your place at the event](#)

What the event will cover

In this webinar, we will put a spotlight on how to get published in Education Journals in a conversation with two of our Senior Editors from Cogent Education.

We are excited to introduce to the series Professor Anatoly Oleksiyenko and Dr Marnie Best to give their insight on the publishing landscape within this field and share the editor's perspective on what researchers can do to make their submissions more successful.

We will also be joined by Abi Amey who will begin the session by taking attendees through a basic overview of the current state of the academic publishing landscape, to equip attendees with an understanding of the process, of getting an article published in Education journals like Cogent Education.

See behind the curtain and ask your questions to our experts to demystify the path to getting publishing in this discipline.

This webinar is designed primarily for researchers with little or no previous publishing experience, & those that are seeking to engage more closely with the scholarly discourse within journals in this field.

This webinar is part the Taylor & Francis Researcher Webinar Series 2024.

About the speakers

Speaker biographies for **Professor Anatoly Oleksiyenko**, **Dr Marnie Best**, and **Abi Amey** are coming soon.
